

Technical Skills

Programming

- Knowledge of Typescript, Java, Flutter, C and C# along with related libraries and frameworks for backend development, RestAPI and Full Stack applications
- Knowledge of Big Data algorithms and development of quantum circuits using Python libraries

Microcontrollers

- RFID and NFC projects using Arduino
- IOT projects with protocols such as MQTT and LoRa using the ESP32 microcontroller
- Knowledge of serial communication protocols such as I2C and SPI

Networks

- Network analysis using software such as Omnet++, Mininet, GNS3 or Wireshark as well as protocols involved
- MPLS network configuration with Mikrotik routers

Software

- Familiar with Linux environments
- Microsoft Office suite user
